

RUDRAKSH SHARMA

Aspiring Web Developer | Python Enthusiast | B.Tech IT @ KIET

☎ 8958190156 | ✉ sharmarudraksh840@gmail.com | [LinkedIn](#) | Ghaziabad, Uttar Pradesh, India

SUMMARY

Enthusiastic B.Tech Information Technology student at KIET Group of Institutions with a strong foundation in Python and web development. AWS certified with demonstrated knowledge in cloud operations and infrastructure fundamentals. Eager to apply programming skills in real-world projects and seeking a Summer 2026 Web Development Internship to grow as a software professional.

EDUCATION

KIET Group of Institutions

2024 – 2028

B.Tech in Information Technology | Ghaziabad, Uttar Pradesh

TECHNICAL SKILLS

Languages: Python, JavaScript (learning), HTML5, CSS3

Web Technologies: HTML5, CSS3, JavaScript (ES6+ — in progress)

Cloud: AWS (Cloud Foundations, CloudOps) — 2x AWS Certified

Tools: Git, GitHub, VS Code, Google Workspace

Core Concepts: OOP, Data Structures (fundamentals), Problem Solving

CERTIFICATIONS

AWS Cloud Foundations Certificate

Amazon Web Services

AWS Certified CloudOps Engineer – Associate

Amazon Web Services

RELEVANT COURSEWORK

Data Structures & Algorithms • Object-Oriented Programming • Database Management Systems • Operating Systems • Computer Networks • Introduction to AI/ML • Linear Algebra • Probability & Statistics

PROJECTS

GuardAuth CLI Authentication System | Python, Rich, hashlib, JSON

- Engineered a production-quality terminal authentication system utilizing a clean three-tier architecture (Presentation, Business Logic, Data Access) to ensure strict modularity and separation of concerns.
- Implemented robust cryptographic security by hashing passwords via PBKDF2-HMAC-SHA256 with 32-byte unique salts, alongside constant-time string comparison to mitigate timing side-channel attacks.
- Demonstrated enterprise backend principles by applying Dependency Injection and the Repository Pattern to decouple storage logic from core services.

-
- Designed an interactive, dynamic CLI using the rich library, incorporating defensive mechanisms like persistent 5-attempt account lockouts and stringent input validation

Zru Studios Landing Page | React.js, Framer Motion, JavaScript

Engineered a high-performance, interactive frontend landing page focusing on modern UI/UX principles like glassmorphism and state-driven micro-interactions. Developed custom physics-based animations, including a bespoke useTilt React hook for 3D card manipulation utilizing Framer Motion's useSpring and useMotionValue. Optimized rendering performance by implementing scroll-triggered, lazy-loaded components via intersection observers (useInView) to guarantee smooth 60fps animations. Architected a scalable, reusable component library featuring interactive Bento box layouts, dynamic scroll-aware navigation, and animated mockups.
